

# OSTIV Workshop Meteorological Panel BERLIN 2006

## Preliminary Program

Saturday 25<sup>th</sup> 0900 – 1800 loc and Sunday 26<sup>th</sup> November 09:00 – 1100 loc

### PRESENTATIONS

#### Forecasting

- Last version of Sky-View ( PC-MET)  
*Erland LORENZEN*
- Vertical Velocity Analysis in Turkey  
*Zafer ASLAN, A.ÖZTOPAL, A.TOKGOZLU and Z.SEN*

#### Convection

- On tuning regional thermal forecasts (experiences from Eskilstuna, Rieti and Vinon)  
*Olivier LIECHTI*
- Met Service during WGC 2006  
*Bernt Olofsson*
- Enhancement of Vegetation in Arid Areas (Information about this Project)  
*Markus STRACKE and Cordelia MAERKER*

#### Mountain Waves

- Information about the MWP Operation Mendoza”, wave flying over the ACONCAGUA-Region  
*Rene HEISE and Wolf-Dieter HEROLD*
- T-REX –the Terrain induced Rotor EXperiment over the Sierra Nevada  
*Rene HEISE, Wolf-Dieter HEROLD*
- Wave flying over Norway  
*Thomas SEILER*

### DISCUSSIONS

- Further activities about the update of WMO Technical Note 158 (*Olivier Liechti*)
- Report of the IGC Bureau about "thermal records" (*Hermann Trimmel*)
- Technical Soaring (*Edward Hindman*)
- Usefulness of IGC flight recorders for meteorological investigations (*IGC-request*)
